Skills

Software engineer and award-winning graphics editor with extensive experience in engineering and newsroom settings. Hands-on conceptualization, management, and execution of technically-driven initiatives and content.

Experience

QuantumBlack, AI by McKinsey / Principal Software Engineer I

September 2021 - Present, Berlin

- Technical Lead of Kedro-Viz, McKinsey's first open-source software project, leading a team of nearly 10 devs, designers, and PMs
- Technical lead of QuantumBlack's Design Library

Merkle Danmark / Senior Frontend Engineer

December 2020 - August 2021, Copenhagen

- Lead engineer on a client-delivery team, building from the ground up a B2B solution for Denmark's largest construction supplier
- SCRUM participation, orchestration, and demo presentations

Charlie Tango / Senior Frontend Engineer

March 2019 - November 2020, Copenhagen

- Led a five-person development team through a full rewrite of a logistics application
- Solved complex, technical problems for clients and oversaw builds and deploys

Tradeshift / Senior Frontend Engineer

September 2018 - February 2019, Copenhagen

- Design and develop new user-facing interfaces
- Build new features for and maintain Tradeshift's open-source component library

The Wall Street Journal / Newsroom Developer, Graphics Editor

January 2013 - August 2018, New York

- Prototyped, built, and maintained newsroom tools and applications
- Designed and created component-based style libraries

Education

University of New Hampshire / B.S., Applied Mathematics

September 2008 - December 2012, Durham, N.H., U.S.
